

Rental property analysis

You are assigned as a data analyst intern by the Real Estate company in order to give your solutions to the problems described below. Need to analyze dataset and show information. When trying to solve the issues, read the problem statement and think carefully about what is being asked. Now, time to start!

1. Need to show information about the building which was built more than 50 years before and has a washer.
2. Need to show information about each age of the building which has washer, elevator and gym and show mean of price and size of building.
3. Need to show information about the 1 square meter price house which has 2 bedrooms and it takes 10 minutes or less to get to the subway. (1 Square Feet to Square Meter – 0.093)
