Computer Hardware

If you want to study data science and like coding, you need acquire a laptop that is fast enough and provides a comfortable learning experience. So, throughout the learning process, a good laptop is essential since it will not prevent you from trying out new and exciting things in the field of Data Science at any moment.

A standard laptop may not be ideal for Machine Learning or AI work. So, while selecting a laptop, keep a few key elements in mind that will undoubtedly improve your studying experience and make you unstoppable!

And one of the main parameter of computers which you must focus on is CPU. In this project you need to forecast performance of CPU which is characterized in terms of cycle time and memory capacity and so on.
